Facilities Department

UTILITY & SERVICE INTERRUPTION NOTICE

please post

Building/s affected: **Beckman Institute – Courtyard**

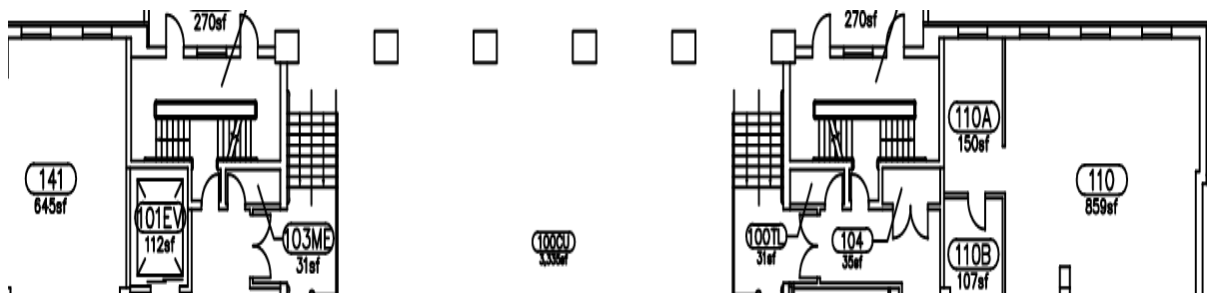

Utility or service being interrupted: **Moderate Noise, Mild Vibration and Sporadic demo for Acoustical Testing Purposes**

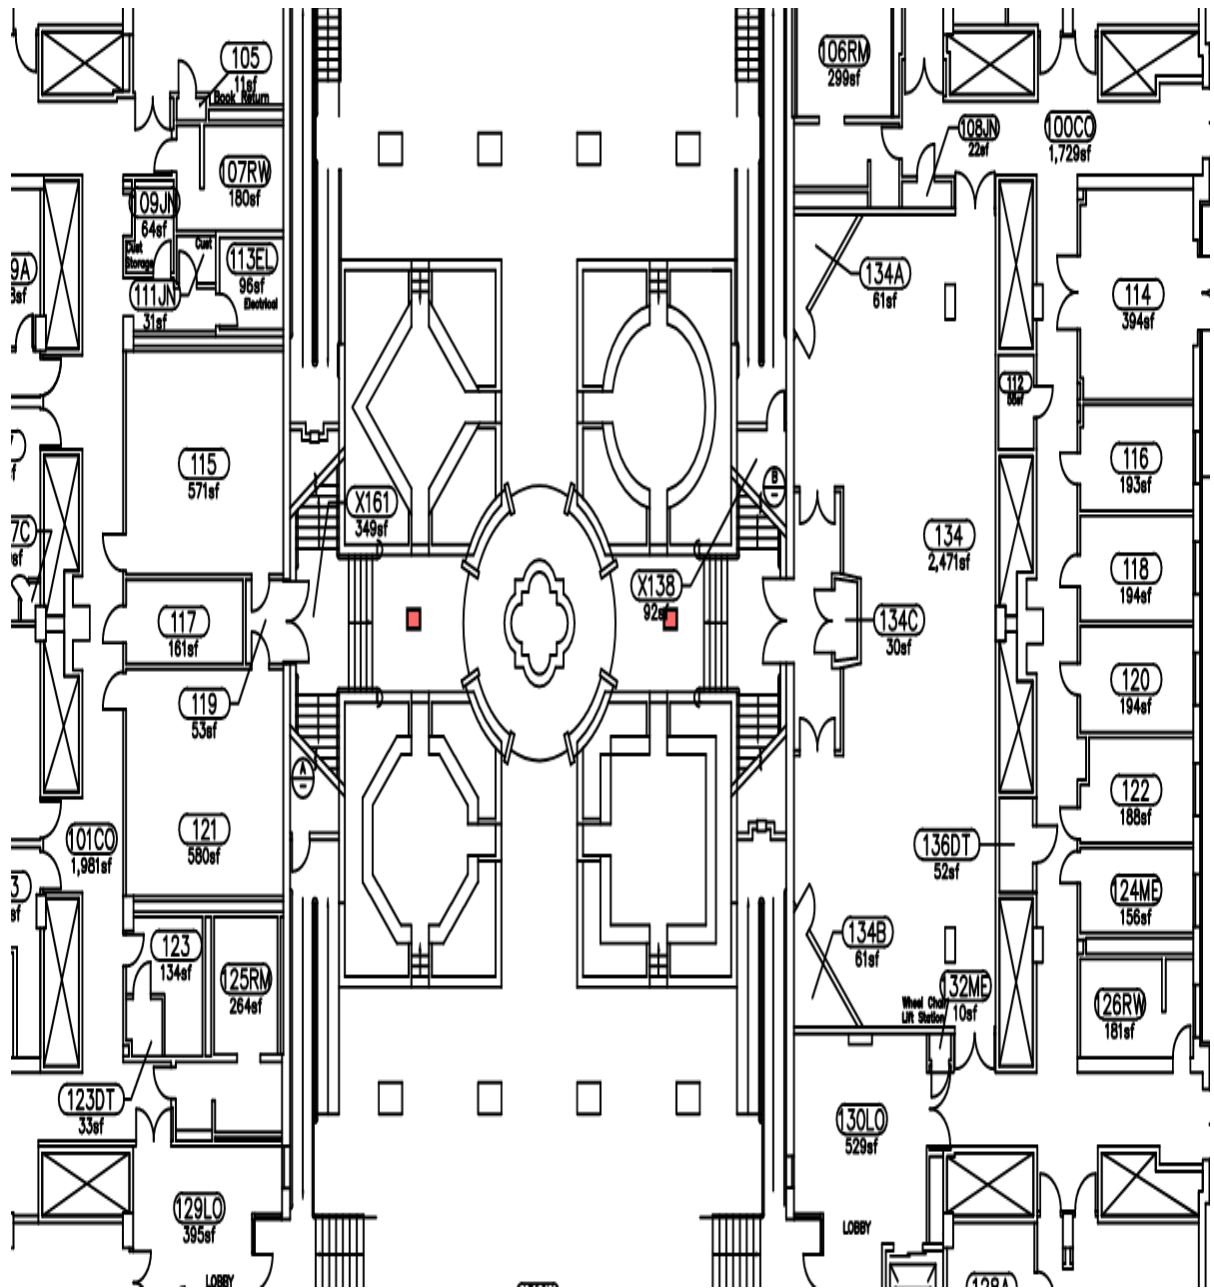

Date & Time of interruption: **Wednesday – 05/20/2026 from 8am – 9am**

Potential impact: CIT PD&C have coordinated with Beckman Institute personnel to prepare for a soft demo in preparation for the courtyard renovation. Caltech has onboarded Acoustical Engineer – AES to perform acoustical readings. In preparation for the demo we have installed sound and vibration monitors in approved rooms throughout the B2, B1 & 1st floor to track the data from the demolition that is forthcoming. We will be conducting a soft demo in two (2) locations. One on the east side of the water fountain and one on the west side of the water fountain. Below are marked locations of where we plan to conduct the saw cutting and jack hammering to capture the data trends for the acoustical engineer. This work will be sporadic and will allow us to mimic the work that is forthcoming with the courtyard renovation.

There will be periodic noise, dust, odor, and mild vibration from DEMO (Jackhammering) & SAW CUTTING in the marked locations below. Please feel free to reach out for more detailed information. Thanks in advance for your flexibility.

Contact: **Lauvai Tufele: 619-900-563 | ltufele@caltech.edu and/or James Fernane: 702-338-9251 | jfernane@caltech.edu**

If there is a problem with this Interruption, please notify the Service Center X-4717 or the above Contact as soon as possible.
 If no response is received, we will proceed with the interruption.
